## **PROJECT: ASTERAS BEACH VILLA**

***Brand Development by Alina Tsolakakis***

Absolute luxury can be found in Agia Paraskevi, Santorini. In this villa, classical design dominates with wood and carved stone, skirting the norms of traditional Cycladic architecture.

## THE CONCEPT

With a vast plot of land, Alina Tsolakakis built a villa that offers exclusive services, features a unique style and provides absolute privacy to guests.

## THE REALIZATION

A few steps away from the beach, surrounded by a huge garden, Asteras Beach Villa provides visitors with luxury and homey hospitality. Alina Tsolakakis highlights the villa's special characteristics with exceptional materials: brown shades and

wood elements prevail in the building's interior, harmonizing with the outdoor environment.

Special care was given to the surrounding area. Plants decorate the garden while an Olympic-size saltwater swimming pool reflects the villa's supreme luxury. Carved stone covers the patio surface, complementing the indoor wooden floor and Chesterfield couches in the living room. The villa's upper floor features three exceptional bedrooms en-suite bathrooms.
